DETAILED ACTION

Allowable Subject Matter

1. Claims 1-2 and 6-10 are allowed.

The following is an examiner's statement of reasons for allowance: As stated in the previous office action, the prior art of record fails to show or reasonably suggest the claimed invention taken as a whole, the invention comprising a television receiving apparatus comprising a first data receiving unit that receives communication data via the internet and a second data receiving unit that receives broadcast data from a broadcast station, wherein the broadcast data includes event program data accompanied by a plurality of event messages; a decoder that decodes the communication data received by the first data receiving unit and the broadcast data received by the second data receiving unit; a display control unit that when the decoder decodes communication data controls to display the communication data and when the decoder decodes broadcast data controls to display the broadcast data; a memory unit for storing the event program data received by the second data receiving unit; and specifically, a control unit that switches the decoder from decoding communication data upon receiving a first event message that accompanies the event program to read the event program data from the memory unit so as to display the event program data (via the display control unit). When a second event message that accompanies the event program data is received, the control unit switches the decoder from decoding the event

Art Unit: 2423

program data to decoding the communication data received via the internet so as to display the communication data (via the display control unit) as characterized by the claims by "a control unit that, when the decoder is decoding the communication data received via the Internet in accordance with the first decoding method, and a first event message that accompanies the event program data is received by the second receiving-unit, switches the decoder in response to the first event message from decoding the communication data to decoding the event program data read from the memory unit so as to display the event program by the display control unit on the display, and when a second event message that accompanies the event program data is received by the second receiving unit, switches the decoder in response to the second event message from decoding- the event program data to decoding the communication data received via the Internet so that the decoded communication data is displayed by the display control unit on the display".

Applicant's amendment, removing the phrase specifying the event data is received in the broadcast data, does not affect the scope of the claim because the limitation "wherein the broadcast data includes event program data" also requires the deleted limitation. Therefore, the reasons for allowance previously stated in the prior office action are maintained.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2423

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
